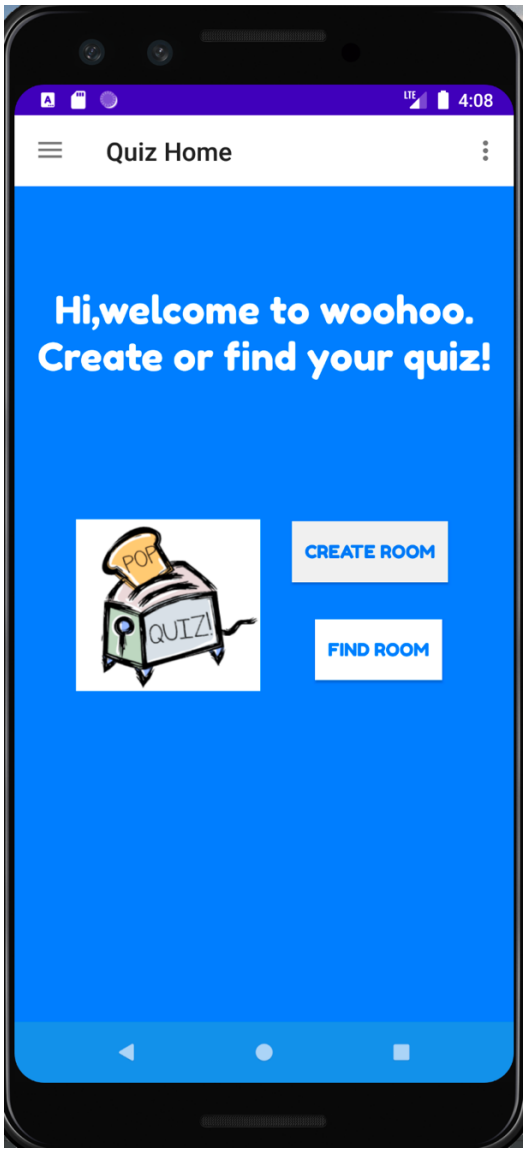
HOME PAGE

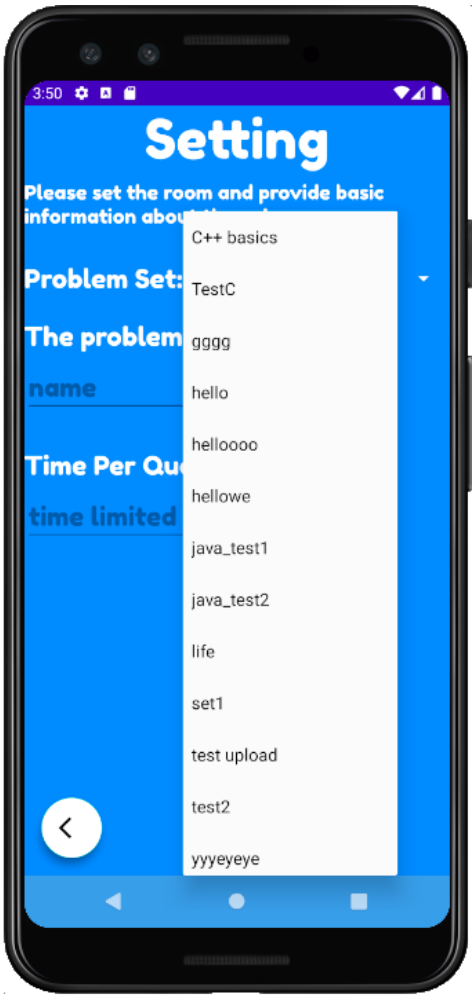
Main Page

In the homepage, you can see two buttons. One is for create a quiz room, and another one is for find a room. Through this page, users can create a quiz room or enter a quiz room. Thus, they can do a set of problems at the same time.

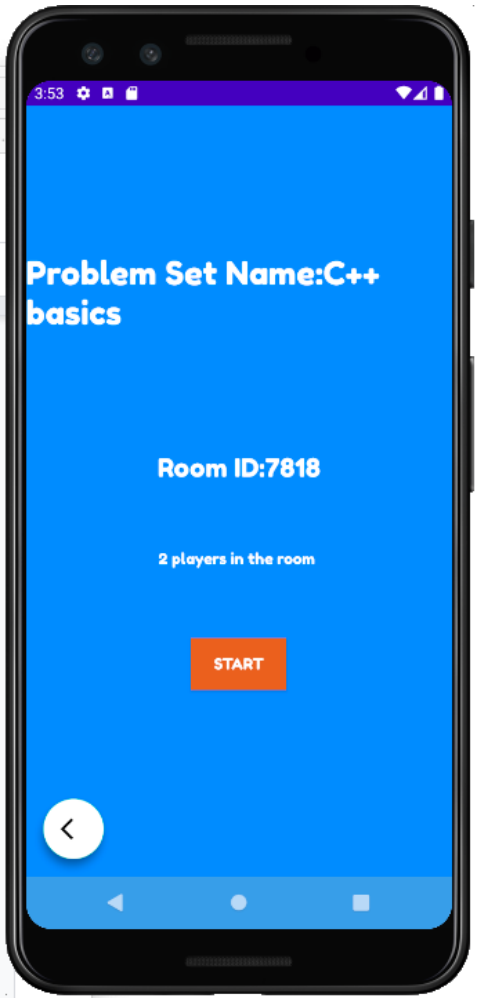


Create Room

Enter the name of the problem set you want to play with, and the time per question for your game.
After creating your room, you will get a digital code for your room, which you can distribute to your friends or students so that they can join your game.
With all players ready, you can click the “Start” button to start the game for all players in this game.



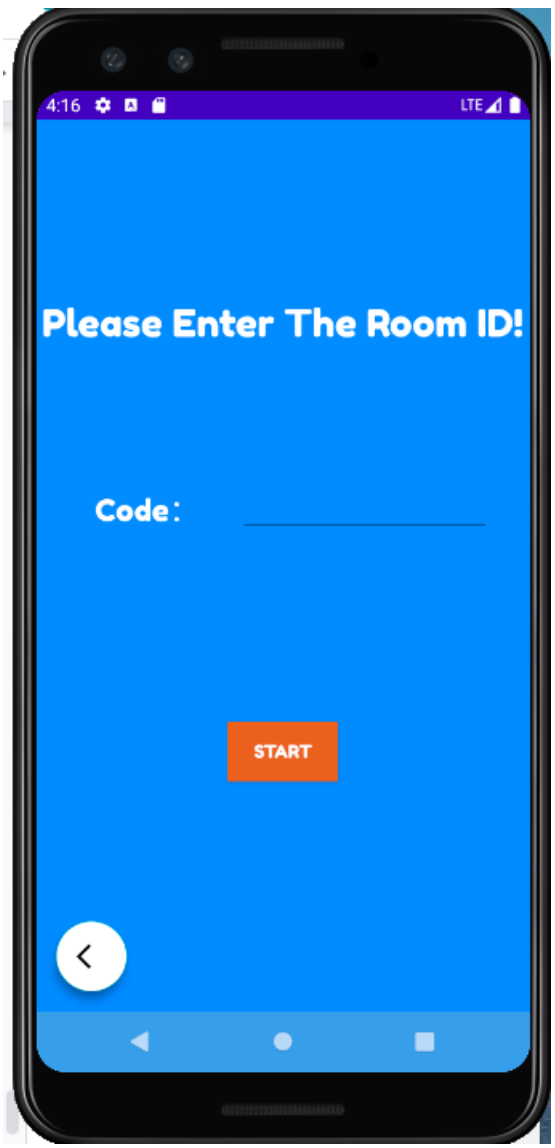
Setting

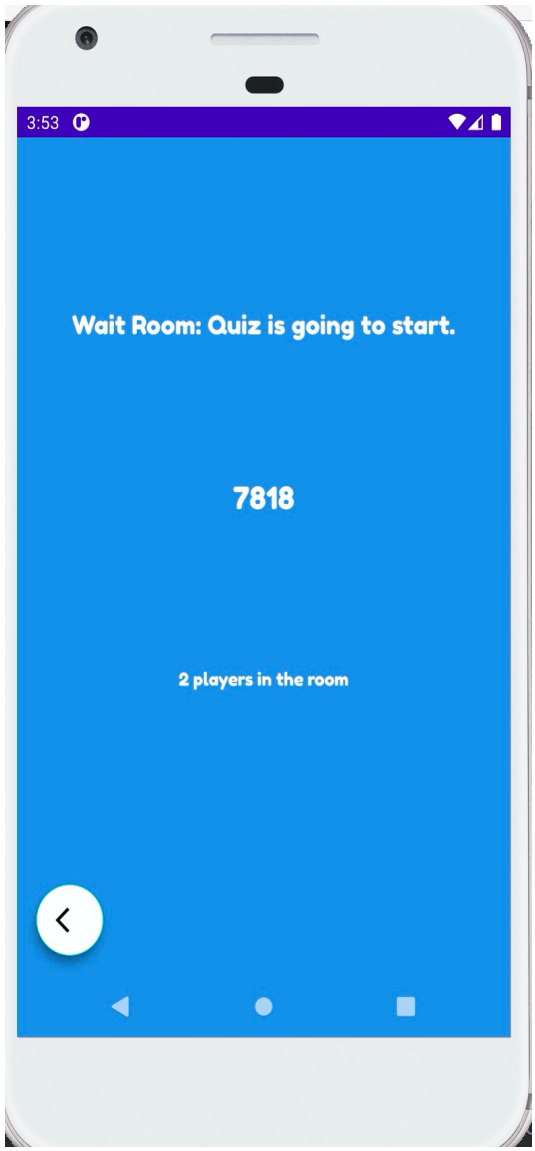


Waiting Room

Find Room

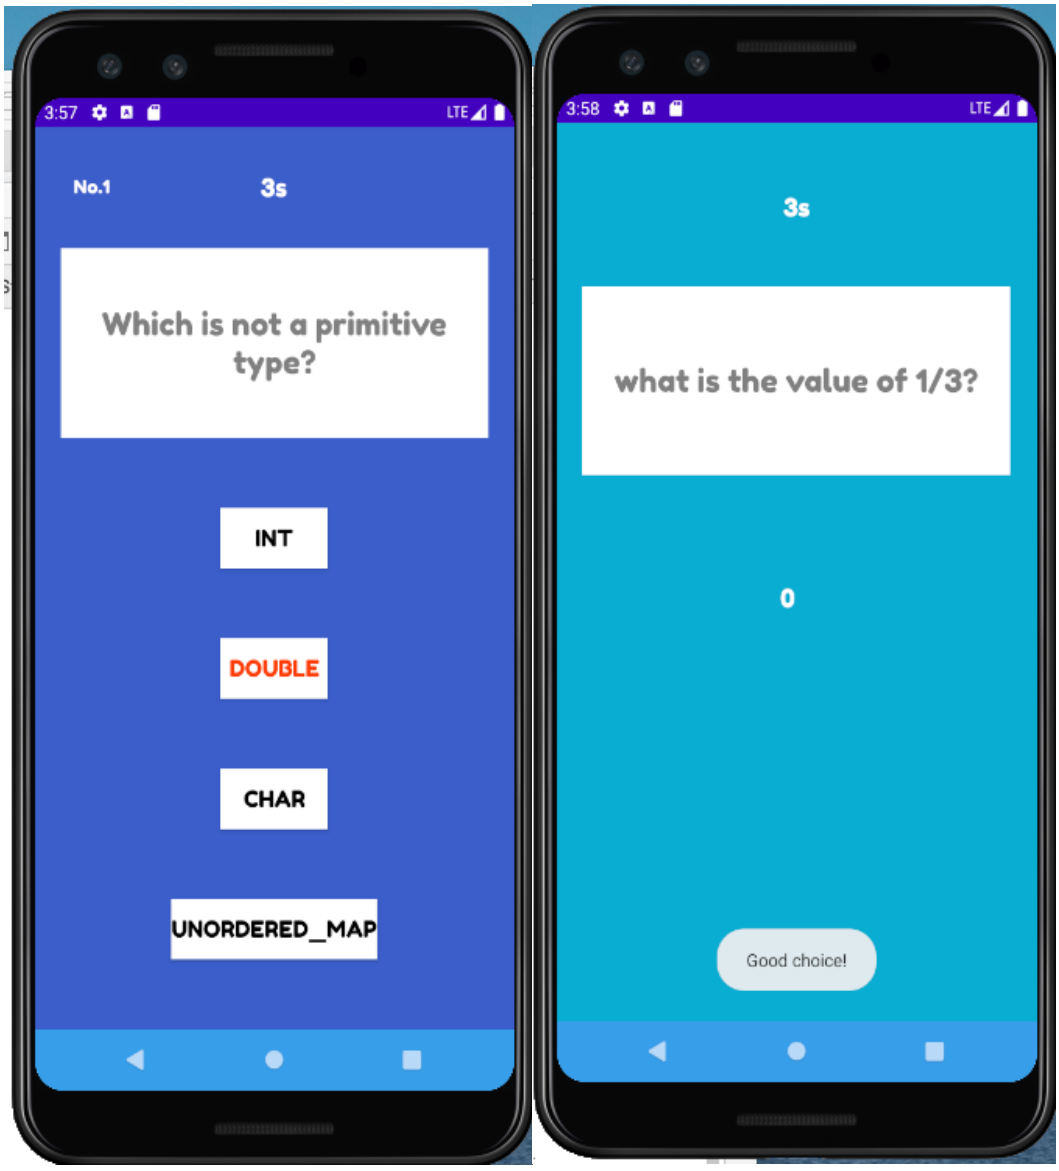
Enter the digital code for the game you want to play and click the “Start” button You will be directed to the waiting room, which shows how many players in the room. When the host starts the game, you will automatically be directed to the quiz part.





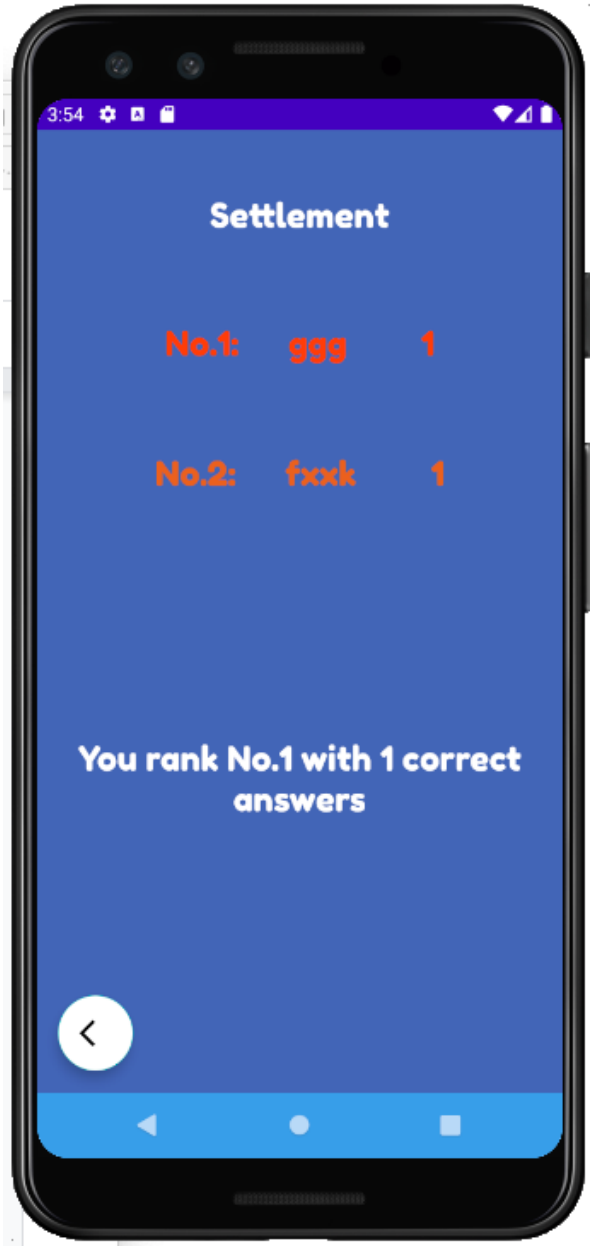
Quiz

For each question, question description, answer choices, current index of problems and timer will be displayed. You can change your answer until the timer is up.
After each question, you will be shown the correct answer and question description. Then, it will direct back to the next question.



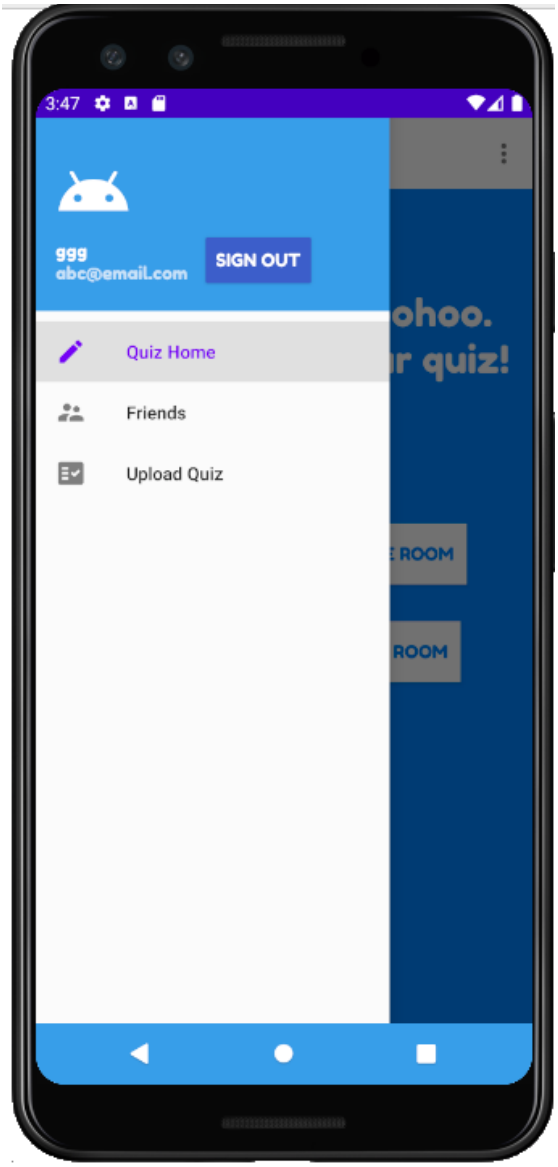
Ranking

After all questions are answered, you will be directed to the settlement page, which shows the nickname and scores of the top 3 players. Also, you can check your ranking in all players.



Side Menu

Other pages, like sing up, log in, friends and upload quiz, can all be accessed from the side menu.



FRIEND PAGE

Prerequisite
